Tank trucks

## PRODUCT

### TECHNICAL SPECIFICATION

- Adaptation to the country specifications.
- Tank capacity from 2950 à 30 000 liters.
- Flow rate from 5 to 150 m<sup>3</sup>/h.
- Use as aircraft refueler or classic refueler.

### Chassis

- Compliance with the chassis manufacturer's prescriptions for optimum reliability and integration.
- All materials : Steel, Aluminum, Stainless steel.
- Several compartments possible.

### Safety

- Tank realized according to ADR standard relating to the carriage of dangerous goods by road.
- Filtering according to API/IP1583 or 1581.
- Hose complying with EN 1361.

### Reference

- Design inspired from equipments realized for the French Army Fuel Department and Defense Department of various countries (Belgium, Ivor, Cost, Libya...).

- Tank mounting on all truck chassis types and brands
- Respect of international airport standards
- Simplified design : Taking into account of imperative operation in extreme conditions

### Conception

- Simplified control circuit.
- Easy maintenance.
- Easy use.

### FUNCTIONS

- Measured dispensing.
- Filtering
- Products transfer
- Self loading
- Product recovery
- Aircraft coupling interface and/or nozzle

### DESCRIPTION

- From 1 to 4 dispensing lines.
- Dispensing cabinet located on the tank front or rear.
- Top or bottom loading.

# MILITARY REFUELLING VEHICLES

Refuelling vehicles 10 000 liters

- > 4 dispensing lines
- > On chassis 6x6
- > 26T

Refuelling vehicles 2 950 liters

- > 1 dispensing line
- > On chassis 4x2
- > 10T

Refuelling vehicles 5 000 liters

- > 1 dispensing lines
- > On chassis 4x4
- > 15T

Refueling vehicles 10 000 liters

- > 2 dispensing lines
- > On chassis 6x6
- > 26T

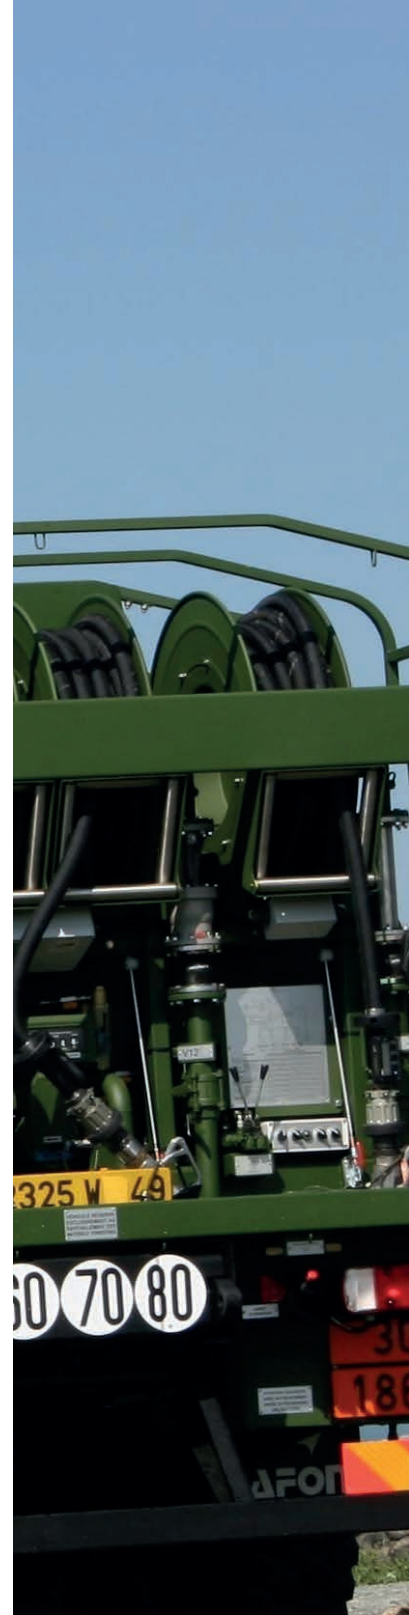

Refuelling vehicles 10 000 liters

- > 1 dispensing lines
- > On chassis 4x4
- > 19T

Refuelling 20 000 litres

- > 2 dispensing lines
- > On chassis 6x4
- > 33T
