

ALL-TERRAIN REFUELLING VEHICLES

LAFON
TECHNOLOGIES

Tank trucks

PRODUCT

- Tank mounting on all 6x6 truck chassis types and brands.
- Respect of international airport standards.
- Simplified design : Taking into account of imperative operation in extreme conditions

Simplified design

- Simplified control circuit.
- Easy maintenance.
- Easy use.

Reference

- Design inspired from equipments realized for the French Army Fuel Department and Defense Department of various countries (Belgium, Ivory Cost, Libya...).

TECHNICAL SPECIFICATIONS

- Adaptation to the country specifications.
- Tank capacity : 10.000 liters.
- Maximal flow rate : 24 m³/h - 400l/min
- Airplane or helicopter refuelling.

Chassis

- Compliance with the chassis manufacturer's prescriptions for optimum reliability and integration.
- Stainless steel tank.
- One compartment with water sump.

Safety

- Tank realized according to ADR standard relating to the carriage of dangerous goods by road.
- Filtering according to API 1583 or 1581.
- Hose complying with EN 1361.

FUNCTION

- Measured dispensing.
- API 1583 Monitor filter.
- Products transfer.
- Self loading.
- Product recovery.
- 1 meter for 2 distribution lines.

DESCRIPTION

- 2 fuelling hoses.
- Rear distribution group.
- Top or bottom loading.
