

Creating solutions

Storage - Distribution - Management

MINING SOLUTIONS

Adapted solutions for challenging conditions

KEEP CONTROL ON YOUR FUEL CONSUMPTION

MANAGEMENT OF YOUR RECEPTION

YOUR STOCK CONTROL IN REAL TIME

STORAGE : LAFON Technologies manufactures single and double wall tanks to ensure a complete watertight of your fuel storage.

ELECTRONIC GAUGE : For a perfect stock control find out the electronic gauge solution :

- > Remote control
- > Level and temperature
- > Product density control
- > Water sensor
- > Fuel Management System (FMS) reconciliation and delivery report
- > Stock alert
- > TCP/IP network connection

RELIABLE AND ROBUST FUEL DISPENSERS

LAFON's dispensers are the fruit of 25 years of experience in the world of fuel distribution. Robust, ergonomic and reliable, the Boxter range was designed to meet all standard requirements. The Boxter are optimized for private fleet refuelling especially for mining trucks refuelling, their reliability are a reference.

Mono-multi product distribution:

- > Modular : 3 -5 -8 m3/h
- > Robust : Heavy use 24/24
- > One or double side

Options : Hose support mast - Breakable connection - Double flow 3/5 - Emergency manual pumps - Satellite - Management system e@sy

High-flow distribution :

- > Measured group 20 m3/h
- > Mechanical display
- > Wiggings nozzels
- > Hose reel

DISTRIBUTION TRACKING

FROM FUEL TERMINAL TO MANAGEMENT SYSTEM

EasyCarb, FMS terminal

LAFON Technologies developed an economical and adaptable management terminal that allows you to securised and analysed your fuel transactions. Easy to use our Easy range will help you to supervise all your site activities and entries.

- > User friendly interface
- > All fuel dispensers compatibility
- > EasyConnect web interface

EasyConnect, management system

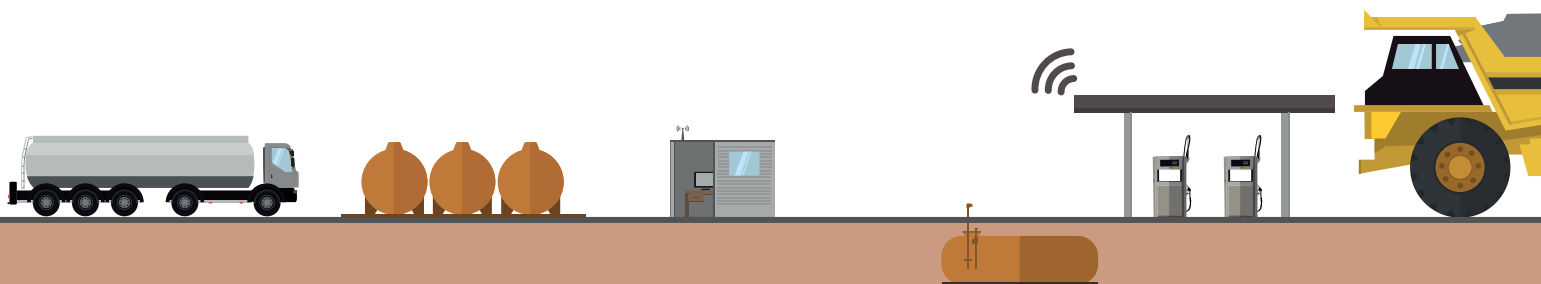

Easyconnect software is a complete management tool developed to meet higher needs of private fleets owners.

- > Stock control
- > Consumption tracking
- > Automatical reporting
- > Maintenance
- > Evolutivity

CLOUD SOLUTION

A Software package integrating a web interface wich allows to every computer with 6.0 internet explorer (at least) to receive datas.

AUTOMATIC VEHICLE RECOGNITION

The automatic vehicle recognition Ready will enable you to secure and analyse your fuel transactions whatever the size of your company or your activity.

A 4 steps functioning

1. Arrival of the vehicle on the fuel station. The driver presents the nozzle to the fuel tank inlet.

3. The vehicle mileage is transmitted to the EasyCarb terminal via the radio relay.

2. The vehicle fuel tank is automatically identified by the nozzle that transmits an authorization request to the e@sy controller. Starting of the dispenser if the vehicle is authorized to take this product.

4. Data feedback to the management software (Local or Cloud)

REFUELLING & NOMADE STATIONS

FROM FUEL TRUCKS TO MOBILE STATIONS

LAFON Technologies designs and manufactures in its french plants vehicles dedicated to mining applications. Those equipment will be able to ensure their service in the harshest conditions.

To support you through your sites our mobile stations will be the equipment for your mining trucks refuelling. Nomade, economical and compact, Mobiltank ISO® is the 3 in 1 solution for your fuel storage, distribution and management.

KNOW MORE :

> +2000

sites equipped with LAFON Technologies' equipment

> STANDARDS
